

CLAIMS

1. A synthetic resin container comprising a container body, said container body having a main body portion formed with a plurality of sectioned recesses, said
5 container further comprising:
a label arranged at said main body portion of the container body and surrounding the main body portion, for providing an improved rigidity of the container.
2. The container according to claim 1, wherein said label is immovably
10 arranged through an adhesive layer.
3. The container according to claim 1 or 2, wherein said label is one of a heat-shrinkable label and a stretch label, which is tightly in close contact with the container body.
15
4. The container according to claim 2, wherein said label is a tack label.
5. The container according to any one of claims 1 to 4, wherein said label comprises an essentially same type of material as said container.
